Part no. and prices: See pricelist

#### **VITORONDENS 200-T** Type BR2A

20.2 to 53.7 kW

##### **Cast iron oil condensing boiler**

With Vitoflame 300 blue flame oil burner (20.2 to 53.7 kW). Suitable for **open flue** and **room sealed** operation and for operation with EL Standard fuel oil DIN 51603-1, **low sulphur** EL fuel oil DIN 51603-1 and fuel oil DIN 51603-6 EL A Bio 10: **Low sulphur** EL fuel oil with blends of up to **10 %** biocomponents (FAME).

#### **VITORONDENS 200-T** Type J2RA

67.6 to 107.3 kW

##### **Cast iron oil condensing boiler**

With Vitoflame 300 blue flame oil burner (67.6 to 107.3 kW). Suitable for **open flue** operation and for operation with EL Standard fuel oil DIN 51603-1, **low sulphur** EL fuel oil DIN 51603-1 and fuel oil DIN 51603-6 EL A Bio 10: **Low sulphur** EL fuel oil with blends of up to **10 %** biocomponents (FAME).

## Vitorondens 200-T

The Vitorondens 200-T is an advanced cast iron oil condensing boiler at an attractive price.

The sectional cast iron Eutectoplex heating surface guarantees high operational reliability. By ensuring an even heat flux, stress fractures are virtually eliminated. The wide water galleries prevent sedimentation and boiling noises.

Flexible gaskets permanently seal the individual sections on the hot gas side. The horizontal layout of the hot gas flues also permits thorough and easy cleaning of the boiler.

The corrosion-resistant stainless steel Inox-Radial heat exchanger downstream ensures an efficient heat recovery, with residue-free condensation of the flue gases.

The Unit blue flame oil burner stands for particularly clean, environmentally responsible and efficient combustion.

- Ⓐ Inox-Radial heat exchanger
- Ⓑ Highly effective thermal insulation
- Ⓒ Eutectoplex heating surface made of homogeneous special cast iron
- Ⓓ Vitotronic digital boiler control unit
- Ⓔ Vitoflame 300 Unit oil burner

- Standard seasonal efficiency [to DIN] up to 97 % ( $H_s$ ) [gross cv] / 103 % ( $H_i$ ) [net cv].
- Eutectoplex heating surface for high operational reliability and a long service life.
- Cast sections with flexible gaskets for durable sealing on the hot gas side.
- Corrosion-resistant stainless steel Inox-Radial heat exchanger.
- JetFlow system for optimum heating water distribution.

- Easy to use Vitotronic control unit with plain text and graphic display.
- All commercially available EL fuel oils can be used. Also for fuel oil DIN 51603-6-EL A Bio 10: Low sulphur EL fuel oil with blends of up to 10 % bio-components (FAME).
- Quiet operation thanks to externally fitted silencer.
- Horizontal hot gas flue layout enables simple and affordable maintenance.

h (with horizontal flue gas connection)	mm	1772	1772	1772	1904	—	—

### Information on the Vitorondens 200-T up to 35.4 kW when using a DHW cylinder installed below the boiler:

To reduce the installed height, the boiler can be ordered with accessories for horizontal room sealed operation (comprising an 87° flue bend and a suitable boiler flue connection).

### Minimum clearances

- (A) Boiler
- (B) Heat exchanger
- (C) DHW cylinder

## Specification – type J2RA, 67.6 to 107.3 kW

<b>Rated heating output</b>

<b>Energy efficiency class</b>		A	A	A

### Note

Vitorondens 200-T, type J2RA, should be provided with sound attenuation if sited near rooms that are sensitive to noise. A sound insulation kit for open flue operation (see page) can be used, which reduces noise emissions by around 6 dB(A).

\*<sup>3</sup> Values for calculating the size of the flue system to EN 13384 relative to 13 % CO<sub>2</sub> for EL fuel oil.

Flue gas temperatures as average gross values to EN 304 at 20 °C combustion air temperature.

\*<sup>4</sup> Observe when sizing the chimney.

## Specification – type J2RA, 67.6 to 107.3 kW (cont.)

- |   |                                     |
|---|-------------------------------------|
| (A) Dimension incl. adjustable feet (when installing without plinth)    | (F) Safety valve                    |
| (B) Boiler flow/return distributor with integral safety equipment block | (G) Plinth                          |
| (C) Boiler flue connection  | E Drain                             |
| (D) Silencer  | KTS Boiler water temperature sensor |
| (E) Air vent valve  | KV Boiler flow                      |

|   | KOA Condensate drain                |

### Note

Due to the design, the burner silencer hood protrudes beyond the front of the boiler. With the Vitorondens 67.6 to 107 kW, we recommend ordering a boiler plinth separately. If a boiler plinth is not ordered, the boiler must be sited on a suitable base.
